

CYBERSECURITY SUMMIT 2025

*THE PERIMETER
HAS SHIFTED*

June 19 2025

LET'S GET STARTED!

WELCOME TO THE CYBERSECURITY SUMMIT

THE PERIMETER HAS SHIFTED –
CYBER RESILIENCE IN A BORDERLESS WORLD

WHY WE'RE HERE TODAY

- Perimeters are blurring.
- Attacks are constant.
- Recovery is the new defense.

DIAGNOSIS

- We've built higher walls.
- Bought more tools.
- Trusted in frameworks.

THE ILLUSION OF CONTROL

- AI dashboards $\neq$ resilience
- Compliance $\neq$ immunity

SYSTEMIC SYMPTOMS

- Misaligned incentives
- Siloed teams
- Fear-based strategy
- Ignored basics

REALITY CHECK

- Missing patches
- No MFA
- Bad configuration
- Forgotten legacy tech

SHIFT YOUR THINKING

- Resilience =
assume breach
- Resilience =
recover fast

THE NEW CYBERSECURITY ERA

- Plan for disruption
- Design for continuity
- Think in scenarios, not silos

LEARN LIKE AN ATTACKER

- They test assumptions
- They chain weaknesses

QUESTIONS WE MUST ASK

- Where your vulnerabilities are
- How to reduce risk
- How to detect & respond faster
- How Access42 and CyberTIM SOC can help

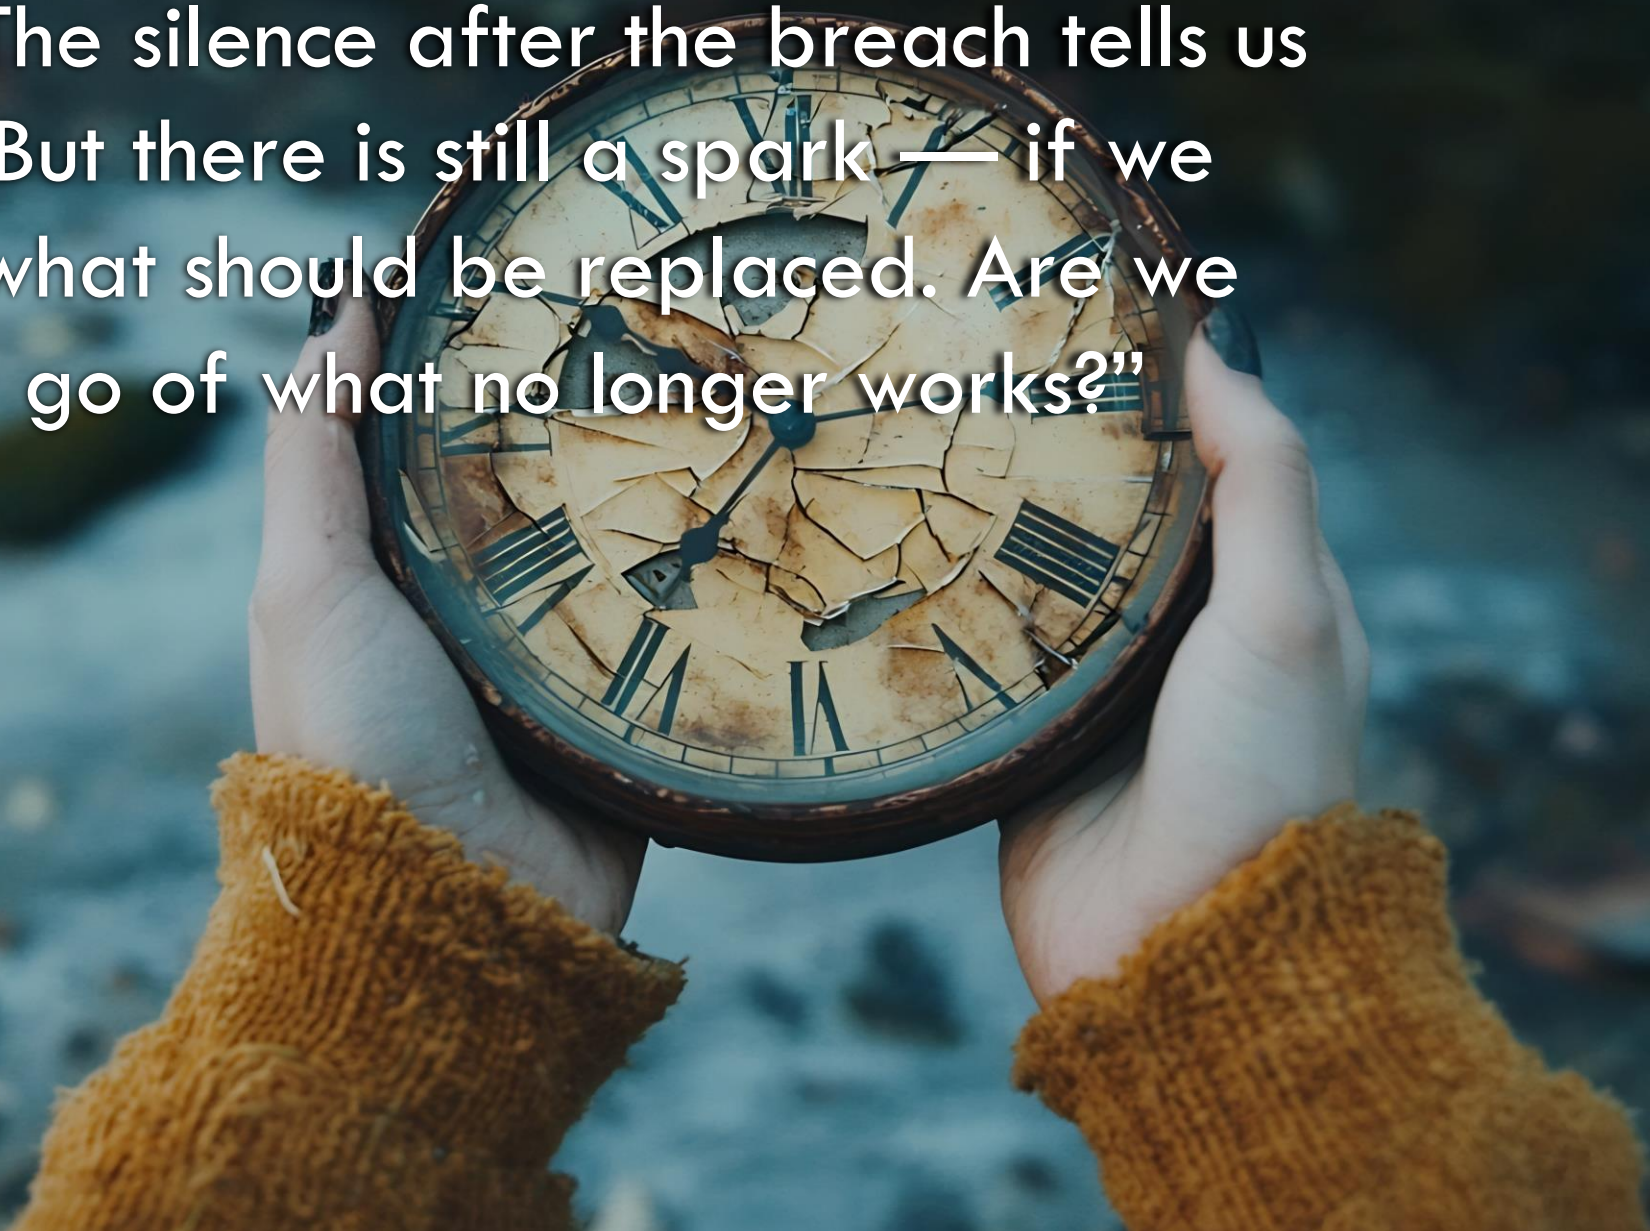

CALL TO ACTION

Stop focusing on
incremental
improvements to
failing systems.

Start building
something
fundamentally better.

“The clock has stopped ticking. The old model has failed. The silence after the breach tells us everything. But there is still a spark — if we stop fixing what should be replaced. Are we ready to let go of what no longer works?”

THANK YOU!

Ronald Kingma
